

TrialDesk Secretary Manual

Create, prepare, run, score, place, export, and close an SDDA trial

PURPOSE: A practical, step-by-step operating manual for trial secretaries using SDDA TrialDesk. It follows Sporting Detection Dogs Association Master Rule Book v5.1, effective July 1, 2026, and the implemented TrialDesk workflow.

Manual version	Rules authority	Application scope
1.4 September 14, 2026	SDDA Master Rule Book v5.1	Scent, Games, and Combined trials

This manual explains the secretary's administrative workflow. The current SDDA rulebook, sanction approval, premium list, judge's instructions, and official SDDA forms remain controlling if they conflict with this guide.

Updated in this edition: every primary TrialDesk page was re-audited, current workflow screenshots were added, Trial Team and Activity Journal instructions were expanded, and a page-and-button glossary was added. Screenshots were captured from Example Trial without saving operational changes.

Contents and operating sequence

- 1. Before TrialDesk: sanctioning, premium list, venue, judge, and supplies
- 2. Create the draft trial and select its format and dates
- 3. Configure offerings, FEO, judges, fees, and public details
- 4. Open entries, share the entry form, import CSV responses, and accept entries
- 5. Build and reorganize the running order
- 6. Apply component-specific move-ups
- 7. Generate and verify official score sheets
- 8. Trial-day desk workflow
- 9. Enter scores and make audited corrections
- 10. Review placements and Title Watch
- 11. Finances, official workbook, backup, and closeout
- 12. Troubleshooting and final checklists
- 13. Page and button glossary

RECOMMENDED PRACTICE: Complete a full mock trial before using TrialDesk at a live event. Confirm the entry form, one score sheet from every offered class, the running-order export, scoring, placements, workbook, backup, and printing on the equipment that will be used at the trial.

1. Before opening TrialDesk

1.1 Obtain SDDA approval

1. Confirm the judge and venue. Consult the judge about whether the search areas are suitable for every proposed level, component, and Game.

2. Submit the SDDA trial application. The rulebook requires the relevant application, judge, venue, and contact information at least 60 days before the trial.

3. Wait for publication. After approval and SDDA publication, prepare the Premium List and entry form. Do not distribute the public entry form earlier than allowed by the current SDDA instructions.

4. Document changes. If the judge, venue, offering, schedule, or Premium changes, notify entrants and SDDA promptly and be prepared to refund as required.

1.2 Gather setup information

Information	What to have ready
Trial identity	Trial name, host club, venue name, full address, and trial dates
Sanction details	SDDA trial number for each day when issued; judge name and substitutions
Offerings	Scent levels/components and/or Games; any FEO limits; capacities
Pricing	Scent component/three-component/Elite fees; separate Regular and FEO Games fees
Competitor information	Secretary contact, payment instructions, cancellation/refund terms
Operations	Search-area sequence, officials, timers, stewards, staging, printing, backup plan

1.3 Physical host checklist

- Prepared scent kit and separately stored clean supplies
- Correct official score sheets, clipboards, pens, calculators, stopwatches, and spares
- Safe search areas, clearly marked boundaries and starting marks
- Containers, vehicles/objects, distractions, replacement hide objects
- Enough judges, timers, stewards, gate staff, and a sight-screened staging area
- A posted running order and a check-in station
- Printer access or all required judge packets printed in advance

2. Create a trial

Figure 1. TrialDesk dashboard. Select an existing trial or start a new draft; the operation links follow the trial through setup, entries, running order, sheets, scoring, results, export, and closeout.

- 1. Sign in.** Use the secretary account assigned to the trial.
- 2. Select Create trial.** Use the left menu or the dashboard button.
- 3. Enter trial details.** Use a recognizable trial name, the legal host/club name, and the complete venue address shown to competitors.
- 4. Choose the trial format.** Choose Scent, Games, or Combined. Combined presents both workflows in the same trial workspace.
- 5. Add the trial dates.** Enter unique dates in chronological order. Each becomes a separate trial day in TrialDesk. TrialDesk currently accepts one to four dates; this is an application limit, not an SDDA rule.
- 6. Create Draft Trial.** A draft does not accept public entries. It can be completed as information arrives.

Chris Johansen
Trial Secretary

Dashboard > Trials > Create

Create SDDA Trial

Set up a Scent trial, Games trial, or a Combined event with one-to-four days.

Trial details

SDDA host and venue information.

Trial name

Host club

Venue and full address

Facility name, street address, city, province, postal code

Shown to competitors on the entry form and trial documents.

Trial format

Choose what this event offers. Combined trials include both regular scent classes and SDDA Games.

☒ **Scent**
Started through Elite: Container, Interior, and Exterior.

☐ **Games**
Aerial, Distance, Speed, and Team games.

☐ **Combined**
Scent classes and Games in the same trial.

Trial days

Select between one and four unique dates.

mm/dd/yyyy

+ Add trial day

Create the draft with the information you know now. On the next screen you will choose offerings and fees for each

Figure 2. Initial trial creation. Trial numbers, judges, offerings, fees, and public instructions are completed on the next screen and may be amended later.

RULE DISTINCTION: SDDA defines a trial as a single offering of any level within a 12-hour period with a unique trial number. A consecutive set of trials is a trial event. Enter the SDDA numbers exactly as issued for each TrialDesk day.

2.1 Edit an existing trial

- 1. Open All Trials.** Find the trial and select Edit trial. The same editor is available from the trial's edit address.
- 2. Update trial identity.** Change the trial name, host club, venue/address, or Scent/Games/Combined format, then select Save trial changes.
- 3. Update trial days.** Revise dates, add days up to the four-day TrialDesk limit, or remove only the final day. Enter dates chronologically and select Save trial days.

Date changes preserve each existing Day number and everything attached to it. Removing a day is blocked until its offerings are cleared and it contains no competitor runs. Reopen a completed trial before making schedule changes.

2.2 Copy a trial

- 1. Select Copy trial.** Use the control on an All Trials card or at the bottom of Edit trial.
- 2. Name the new trial and enter its dates.** Provide one new chronological date for every day in the source trial.
- 3. Review the copy boundary.** TrialDesk copies the club, venue, format, public instructions, pricing, capacities, FEO settings, and offerings. It does not copy entries, dogs, runs, scores, payments, expenses, trial numbers, or judges.
- 4. Create draft copy.** Open the new draft, review every setting, enter new trial numbers and judges, and only then open entries.

3. Configure the draft trial

Figure 3. Trial setup dashboard. The workflow row, operational summary, setup checklist, and trial operation links keep the secretary's work in one place.

3.1 Use the setup checklist

Open the trial. The setup screen tracks offerings, pricing, competitor-facing details, trial numbers, judges, and whether the entry form is open. Amber items may remain pending while the trial is a draft, but resolve them before final packets and exports.

3.2 Enter public details

- 1. Enter the trial secretary.** Provide the name, monitored email address, and optional phone number.
- 2. Write payment instructions.** State when payment is due, method, recipient, reference information, and the consequence of non-payment.

3. Enter cancellation/refund terms. Match the approved Premium List. Keep this text current if SDDA-approved arrangements change.

4. Set the automatic entry schedule. Enter the general opening date/time and public closing date/time. TrialDesk calculates the registered-participant opening exactly three days before the general opening.

5. Save public details and entry schedule. The dashboard shows the current phase: Scheduled, Registered participants only, Open to everyone, Automatically closed, or Manually closed.

3.3 Configure Scent offerings

- For each day, select the offered level: Started, Advanced, Excellent, or Elite.
- Within each level, select Container, Interior, and/or Exterior. Elite must offer all three components. If Started Container is offered, it must be held first and indoors.
- Do not choose Amateur or Working during trial creation. TrialDesk makes both streams available per selected component on the entry form; Elite has no stream.
- Enter a component judge when it differs from the day judge. Both Amateur and Working use that component judge.
- Select Allow FEO entries only where the organizer permits FEO. The public FEO checkbox appears only for those offerings.

3.4 Configure Games

- Select Aerial, Distance, Speed, and/or Team for each day.
- Enter the judge, capacity, Regular fee, and-only when permitted-enable FEO and enter its fee.
- Aerial entrants select High or Highfly. Team entrants identify a requested partner; the secretary finalizes pairings and order.
- Remember the rulebook-specific second-dog provisions: Aerial and Distance allow second dogs; Speed and Team do not.

3.5 Enter day details and fees

1. Enter SDDA trial number and day judge. They may be saved or replaced later if the assignment changes.

2. Enter Scent pricing. Set individual component, three-component package, and Elite fees. TrialDesk uses them to calculate accepted-entry balances.

3. Save setup. Do this before sharing the entry form link. The public form activates automatically at the scheduled time.

FEO: FEO is subordinate to Regular entries. SDDA permits FEO only after regular entries are accepted and allows the organizer to limit FEO by component or level when those limits are stated on the entry form.

3.6 Give another secretary access

Figure 4. Trial Team. Add an already registered TrialDesk user as Secretary, Assistant, or Viewer.

- 1. Open Trial Team.** Use the trial sidebar or the Trial operations buttons on Trial Details.
- 2. Enter the registered email.** The person must already have registered and confirmed that exact email address.
- 3. Choose a role.** Secretary has operational access, Assistant supports trial work, and Viewer has read-only access.
- 4. Select Add to trial.** Re-enter an existing member's email to change the role. Use the trash button only to remove a non-owner member.

4. Entries: collect, import, review, and accept

The screenshot shows the SDDA TrialDesk interface. The top navigation bar includes the SDDA logo, 'SDDA TrialDesk Secretary workspace', the date '9/3/2026, 8:50:09 PM', and the user 'chrojo Trial Secretary'. The left sidebar contains a 'Dashboard' link, 'SDDA Dog Registry', and a 'TRIALS' section with a 'View all' link. Under 'TRIALS', there is a dropdown for 'Example Trial' and a list of trial-related actions: Trial Details, Activity Journal, Entries (highlighted), Trial Team, Competitor Entry Form, Copy Entry Link, Close to Titles, Running Orders, Score Sheets, Score Entry, Results Summary, Official Workbook, Financial Summary, and Trial Closeout. At the bottom of the sidebar is a 'Wk9 fall trial' link and a '+ Create New Trial' button. The main content area is titled 'SDDA Entries' and 'Example Trial · 40 entries'. It features a summary section with seven cards: RECEIVED (0), ACCEPTED (40), WAITLISTED (0), REJECTED (0), FEES OWED (\$7,164.75), COLLECTED (\$0.00), and OUTSTANDING (\$7,164.75). Below the summary is a search bar labeled 'Search handler, dog, or SDDA number', a status filter dropdown set to 'All', and an 'Export mailing list XLSX' button. There is also an 'Import Google Form CSV' button. The main content area displays two entry cards. The first card is for 'Violet' (Stephanie · 5811) and the second is for 'Remy' (Stephanie Geates · 3951). Each card has a status indicator (entered/accepted), a 'Formal alerts' section, a list of working status tags (e.g., 'Advanced Container • Working'), an 'Edit entry' button, and a 'Secretary decision' dropdown set to 'Accepted'.

Figure 5. Entry roster. Summary totals, search, status filter, mailing-list export, CSV import, entry editing, and secretary decisions are available from one page.

4.1 Open and share the built-in entry form

1. Review the preview. Confirm dates, offerings, streams, FEO availability, prices, contact information, payment instructions, declaration, and cancellation terms.

2. Confirm the automatic schedule. Registered participants open three days before the general opening. During that early period, TrialDesk requires a participant number that matches the active SDDA registry. General entry and closing occur automatically.

3. Copy entry form link. Send the public link or place it in the approved Premium/club communication. It may be shared ahead of time; submissions remain blocked until the scheduled opening.

4. Use manual closure only when needed. Close entries stops all new public submissions immediately. Per-day controls can close a full day while leaving other days available. Reopening restores the remaining scheduled window; it

Competitors enter handler/contact details, participant number, dog call name, SDDA registration number or registration pending, breed, per-component Amateur/Working stream, offered FEO selections, formal alerts, title note, and reactivity. The separate Registered Name question and competitor-reported Gold counts are intentionally not used.

1. Export the Google Form responses as CSV. Keep the header row intact.

3. Read every warning. TrialDesk recognizes familiar Google headings, expands all-component selections into individual runs, and rejects selections not offered for that day/level/stream.

[illegible]

4.3 Enter a paper or day-of entry

2. Transcribe the complete entry. Enter the competitor and dog information, choose every requested run, review the declaration with the competitor, and confirm the Review page before saving.

The same registry, offering, FEO, stream, and required-field checks used by the public form also apply to secretary-entered records. Public opening and closing times do not restrict this signed-in workflow: the secretary may enter hosts before opening, transcribe paper entries, or add approved day-of entries after public closing without reopening the public form.

- Open each received entry and verify contact information, call name, SDDA number/pending status, breed, stream, formal alerts, reactivity, and requested runs.
- Confirm capacity and payment handling before changing Received to Accepted.
- Waitlisted, withdrawn, and cancelled entries must not appear in final running orders, score packets, scoring, or fee expectations.
- The secretary can edit an entry after acceptance when a correction is necessary; the activity journal records material changes.
- Use the private receipt/edit link for competitor amendments while entries remain open. Do not publish private edit tokens.

SDDA TrialDesk | July 2026 Rulebook workflow

5. Build and reorganize the running order

The screenshot shows the SDDA TrialDesk interface. The top header includes the SDDA logo, 'SDDA TrialDesk Secretary workspace', the date '9/3/2026, 8:50:11 PM', and the user 'chrojuh Trial Secretary'. The sidebar on the left contains navigation links: 'Dashboard', 'SDDA Dog Registry', 'TRIALS' (with a 'View all' link), 'Example Trial' (selected), 'Trial Details', 'Activity Journal', 'Entries', 'Trial Team', 'Competitor Entry Form', 'Copy Entry Link', 'Close to Titles', 'Running Orders' (highlighted), 'Score Sheets', 'Score Entry', 'Results Summary', 'Official Workbook', 'Financial Summary', 'Trial Closeout', 'Wkk9 fall trial', and a '+ Create New Trial' button. The main content area is titled 'SDDA Running Orders' and includes a sub-header 'Move-ups are component-specific and may be approved on any trial day.' and an 'Export running order XLSX' button. Below this, there are filters for 'Day 1: 2026-06-06', 'Started', and 'Container'. The 'Started Container' section shows '6 runs' and includes an 'Apply SDDA order' button and a 'Save' button. A table lists the runs:

Run	Dog Name	Handler	Component	Move up	Reposition
1	Hutch	Cathy Maltby 4362	Regular	Move up	↑ ↓
2	Milo	Dee Howard 6773	Regular	Move up	↑ ↓
3	Truman 6663	Sandee Baker 6663	Regular	Move up	↑ ↓
4	Quinn	Claudia Boecking 6686	Regular	Move up	↑ ↓
5	Brandy	Adrienne Gould 7137	Regular	Move up	↑ ↓
6	Tonka	Michelle Eadie 6146	Regular	Move up	↑ ↓

Figure 7. Running Orders. Select a day, class, and component; apply SDDA order, assign run groups, approve move-ups, reposition runs, and save before exporting.

5.1 Generate the initial order

- 1. Accept entries first.** Only accepted entries become operational runs.
- 2. Open Running orders.** Select the trial day and generate or review the order for each level/component and Game.
- 3. Apply SDDA group order.** TrialDesk orders Scent runs as Officials, Regular, Second dog, FEO, then BIS. Games show Regular before FEO.
- 4. Review conflicts.** Check handlers with multiple dogs, officials who must run before duties, reactive-dog notes, Team partners, simultaneous rings, and travel between search areas.

5.2 Change group or position

- Use the run-group control when the secretary must mark Official, Second dog, FEO, or BIS. Competitors do not choose Official, Second dog, or BIS on the public form.
- Drag a run to its required position inside the applicable class/order. Save the order before leaving the page.
- Keep second dogs at the end of the component so the judge can change hides. Keep BIS after the second-dog group. Keep FEO after Regular and before BIS.
- If a judge approves a trial-day change in component order, Started Container still must be held first when offered.
- Re-check every component because the rulebook warns that a competitor's position may change between components.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1	Saturday Runs														DAY TOTAL
2															106 RUNS
3	Trial #				Date 2026-06-06				Venue who knows				Judge		
4															
5	Saturday — Started														Class total: 19 runs
6	Container				6 Reac Interior				6 Reac Exterior				7 Reac		

Figure 8. Header from an actual TrialDesk running-order export. Each day receives its own worksheet with a day total, trial metadata, level-coloured class bands, component columns, reactive indicators, and class totals. Review the complete workbook's names, streams, run groups, conflicts, and sequence before posting.

5.3 Export and post

- 1. Save the running order.** Resolve any on-screen conflict warnings.
- 2. Export running order XLSX.** Open it in Excel and inspect every day/level/component.
- 3. Print or post copies.** Place a current copy at check-in and/or the handler staging area. Mark superseded copies clearly.

6. Component-specific move-ups

A qualifying component permits that same component at the next level: Started -> Advanced or Advanced -> Excellent. An Excellent title across all three components is required for Elite, so TrialDesk does not treat an individual Excellent component pass as an automatic Elite move-up.

6.1 When to approve a move-up

- The dog has a verified qualifying result in the same lower-level component.
- The destination level/component is offered on the relevant trial day.
- The move-up does not duplicate the same component in the same trial.
- The stream remains correct: after a processed title, continued entries at the titled level must be Working; at the next level the dog may again compete as Amateur unless the handler/dog otherwise belongs in Working.
- The secretary has evidence even if the qualification occurred at an earlier trial. Record the source in the activity/audit context.

6.2 Apply the move-up in TrialDesk

- 1. Open Running orders.** Choose the day containing the run to be changed.
- 2. Find the component run.** Confirm dog, handler, day, stream, and current level.
- 3. Select Move up.** Review the confirmation showing the old and new level.
- 4. Confirm and regenerate.** TrialDesk records the previous level, approval time, and approving user, then places the run in the destination offering.
- 5. Reorganize both affected orders.** A move-up changes class counts and may create handler or official conflicts. Drag, save, re-export, and repost the affected order.
- 6. Undo only for a genuine correction.** Use Undo move-up to return the run to its recorded prior level; the change remains auditable.

DO NOT INFER TITLES: Title Watch is an aid. A component move-up requires verified eligibility; a championship or Gold calculation must rely on official SDDA records, not competitor self-reporting.

7. Generate official score sheets

Figure 9. Official Score Sheets. Packet controls remain disabled until accepted runs have a saved running position.

7.1 Prerequisites

- Entries are accepted and unwanted entries are waitlisted/withdrawn/cancelled
- Running order and all approved move-ups are saved
- Trial number, date, judge, dog call name, breed, SDDA number, stream, and formal alerts are correct
- The printer can print the official page size at 100% without fit-to-page distortion

7.2 Export Scent sheets

1. **Open Score sheets.** Confirm the displayed count against the accepted Scent run count.
2. **Choose the required packet.** Export the prefilled official PDF for the selected trial/day or offered set.

3. Inspect representative pages. Open at least one page for every offered level/component combination-not merely one page per level.

4. Verify mapped fields. Check trial number/date, call name, breed, SDDA number, formal alerts, stream checkbox, FEO marker, and footer sequence.

5. Print working and spare copies. Provide originals to the judge and copies for any shadow judge according to SDDA requirements.

SDDA Started Score Sheet Container

Host/Secretary to complete: TRIAL # T-123 TRIAL DATE: 2026-06-06
Dog's name: Sample Dog Breed: All Canadian Dog's SDDA number: 12345

CONTAINER SCORE Odour: Wintergreen Time Limit: 3 minutes Stream: ☒ Amateur ☐ Working

Find	Yes = 15 No = NQ	
Indication (is the dog clear, confident and close with its body language?)	Excellent = 5 points Deductions for: ☐ damages hide ☐ bothers hide substantially ☐ minimal change of behaviour ☐ none seen	
Dog's Search Performance	Excellent = 5 points Deductions for: ☐ lacks focus/distracted ☐ passes hide after sniffing it ☐ disregards handler direction ☐ noticeably damages objects	
Handler Search Performance	Excellent = 5 points Deductions for: ☐ poor control of dog or leash ☐ handler reads dog poorly ☐ inconsistent search sequence ☐ moves objects without permission ☐ contaminates search area ☐ rough handling	

NOs: ☐ Timed out ☐ False Alert (called) or No find ☐ Excused for stress/pain ☐ Eliminated in search area ☐ Left search area due to avoidance, fear or distraction ☐ Handler withdrew ☐ Harsh handling (abusive or repeated verbal or physical corrections) ☐ Exposed scent container before alert was called ☐ Disturbed search area to extent that judge cannot identify hide ☐ Prohibited equipment

Saturday - Elite Container - Run 112

FINAL ELITE SCORE

Trial host/secretary to complete:

SCORES: Container + Interior + Exterior = 200 % ☐ Completed title

Total time:

ver 26.07.01

Figure 10. Mapping quality-control example. Every level and component uses an independent official template and coordinate map; never assume one sheet's coordinates apply to another.

7.3 Export Games sheets

Use the Games packet for Aerial, Distance, Speed, and Team. Verify the separate Game mapping, FEO mark, Aerial High/Highfly selection, and Team partner block. Games are Pass/Not Pass rather than numerically scored.

CRITICAL PRINT CHECK: If any text crosses a form line, checkbox X is outside its box, formal alert is missing, or the packet count differs from accepted runs, stop and correct the data or mapping before trial day.

8. Run the trial: secretary desk sequence

8.1 Before competitors arrive

- Print/post the latest running orders and label each revision.
- Sort score sheets in run order by day, level, component/stream, and group.
- Prepare check-in list, registration-pending list, payment list, volunteer assignments, incident materials, ribbons, and spare supplies.
- Confirm search-area order with the judge. Started Container, if offered, is first and indoors.
- Keep clean scent supplies separate from previously scented items; hides are the judge's responsibility unless arrangements were made.

8.2 Check-in

- 1. Confirm identity.** Verify handler, dog call name, SDDA registration number/card, and any pending correction.
- 2. Confirm operational notes.** Ask about BIS, reactive-dog handling, accommodations, withdrawals, volunteer duties, second dogs, and Team partner changes.
- 3. Confirm order.** Tell the competitor that position may differ by component and direct them to the posted order.
- 4. Record changes immediately.** Update the entry/run group/order in TrialDesk and replace affected printed postings.

8.3 During each component

- Officials run before duties when their duties can be temporarily reassigned.
- Regular entries run before second dogs; the judge changes hide location(s) for the second-dog group.
- FEO runs after Regular entries and before BIS. BIS runs last and must follow the current SDDA equipment requirements.
- The steward calls teams from a staging area without visual access to the search area.
- The judge completes score and time, signs the sheet, and returns it to the secretary. The secretary may total the sheet.
- All teams complete the component before score sheets are released/presented.

8.4 Between components or days

Record results, identify verified move-ups, change the next running order, re-run conflict checks, save, export, and repost. Never rely on handwritten changes alone when the next score packet or official workbook will be generated from TrialDesk.

9. Enter scores and corrections

The screenshot displays the SDDA TrialDesk interface for entering scores. The top navigation bar includes the SDDA logo, 'SDDA TrialDesk Secretary workspace', the date '9/3/2026, 8:50:14 PM', and the user 'chrojuh Trial Secretary'. The left sidebar lists various functions: Dashboard, SDDA Dog Registry, TRIALS (with a 'View all' link), and a list of trial-related actions including 'Example Trial', 'Trial Details', 'Activity Journal', 'Entries', 'Trial Team', 'Competitor Entry Form', 'Copy Entry Link', 'Close to Titles', 'Running Orders', 'Score Sheets', 'Score Entry' (highlighted), 'Results Summary', 'Official Workbook', 'Financial Summary', and 'Trial Closeout'. Below these is a 'Wkk9 fall trial' section with a '+ Create New Trial' button. The main content area, titled 'Score entry', features a 'Audited score entry' section with the instruction: 'Accepted entries only. Save all changed cards before taking a break; saved scores reload when you return.' It includes status indicators '0 unsaved' and '0 / 0 recorded', a 'Save all changes' button, and filters for 'Scent (0/0)' and 'All trial days'. A search bar labeled 'Find dog, handler, or SDDA number' is also present. Below the filters, a note states: 'Cards follow the printed running order. Save & next moves to the next result; Save all keeps every changed card available for a break.'

Figure 11. Audited Score Entry. Filter cards, use Save and next while working, and use the sticky Save all changes button before taking a break.

9.1 Scent scoring

1. **Open Score entry.** Only accepted runs appear.
2. **Select the exact run.** Match day, level, component, stream, dog, and handler to the signed sheet.
3. **Enter result.** Choose Qualifying, Non-qualifying, Absent, Withdrawn, or Excused as appropriate.
4. **Enter score and time.** For Qualifying/NQ results, transcribe the signed totals and time. Started components total 30/40/30; Advanced, Excellent, and Elite total 60/80/60.
5. **Save.** Every initial save and correction is recorded in the activity journal.

9.2 Games scoring

Select Pass, Fail, Absent, Withdrawn, or Excused and enter the official time where applicable. Games are not numerically scored. Match Team results to the finalized pair and Aerial results to the correct High/Highfly category.

9.3 Correcting a score

- Keep the signed sheet as the authority
- Open the same run, amend only the incorrect fields, and save
- Confirm that Results, Title Watch, Finances (if status changed), and the workbook now reflect the correction
- Use Activity to identify who changed the result and compare before/after values

PAPER CONTROL: Retain and distribute score-sheet copies according to current SDDA instructions. TrialDesk's digital audit supports-not replaces-the signed official sheet.

10. Placements, results, and titles

The screenshot shows the SDDA TrialDesk interface. The top header includes the SDDA logo, 'TrialDesk Secretary program', the user 'chrojuh Trial Secretary', and the date/time '9/3/2026, 8:50:15 PM'. The left sidebar contains navigation links: Dashboard, SDDA Dog Registry, TRIALS (with a 'View all' link), and a list of trial-related actions like 'Example Trial', 'Trial Details', 'Activity Journal', 'Entries', 'Trial Team', 'Competitor Entry Form', 'Copy Entry Link', 'Close to Titles', 'Running Orders', 'Score Sheets', 'Score Entry', 'Results Summary', 'Official Workbook', 'Financial Summary', and 'Trial Closeout'. At the bottom of the sidebar is a 'Wkk9 fall trial' link and a '+ Create New Trial' button.

The main content area is titled 'Results & placements' and shows the 'Example Trial' details. It includes a '0/214 scored' badge and a 'Print / Save PDF' button. Below this, there are two tables for 'Day 1' results:

Day 1 • Advanced Container • Amateur
0 placement-eligible qualifying runs

PLACE	TEAM	RESULT	SCORE	TIME
—	Kaia Holly Rose	Not scored	—	—
—	Peaches Adrienne Gould	Not scored	—	—

Day 1 • Advanced Container • Working
0 placement-eligible qualifying runs

PLACE	TEAM	RESULT	SCORE	TIME
—	Violet Stephanie	Not scored	—	—
—	Barron Jennifer Glover	Not scored	—	—
—	Bomber Paige Visser	Not scored	—	—
—	Alice Candi Russell	Not scored	—	—
—	Vortex Alisha Ritchie	Not scored	—	—
—	Reyna Tracey Rodd	Not scored	—	—
—	Mylic Megan Reiling	Not scored	—	—
—	Mochi Jen Weekes	Not scored	—	—

Figure 12. Results and placements. TrialDesk calculates provisional placements from recorded qualifying results and excludes FEO from placements.

10.1 Provisional placements

Open Results after scoring. TrialDesk separates Scent by day, level, component, and stream. It includes qualifying runs only, ranks highest score first, then faster time, and excludes FEO. Exact score/time ties share a place. Games placements include passing Regular entries and rank faster time first; FEO is excluded.

- 1. Check completion badge.** Resolve missing scores before treating placements as final.
- 2. Compare with signed sheets.** Spot-check leaders, ties, NQs/fails, absences, withdrawals, and FEO exclusions.
- 3. Print / Save PDF.** Use the results page print control for posting or presentation.

10.2 Title Watch

The screenshot displays the SDDA TrialDesk interface. The top header shows the SDDA logo, 'SDDA TrialDesk Secretary workspace', the date '9/3/2026, 8:50:17 PM', and the user 'chrojon Trial Secretary'. The left sidebar contains navigation links: Dashboard, SDDA Dog Registry, TRIALS (with a 'View all' link), and a list of trial-related actions including 'Example Trial' (selected), Trial Details, Activity Journal, Entries, Trial Team, Competitor Entry Form, Copy Entry Link, Close to Titles (highlighted), Running Orders, Score Sheets, Score Entry, Results Summary, Official Workbook, Financial Summary, and Trial Closeout. Below these is a section for 'Wkk9 fall trial' and a '+ Create New Trial' button.

The main content area is titled 'Title watch'. It features a 'Close to Titles Report' for 'Example Trial' with buttons for 'Export Excel' and 'Print / Save PDF'. A warning icon and text state: 'Maximum-outcome assumption: every required component entered at this trial qualifies. Confirm actual results before presenting titles or ribbons.' Below this are three boxes: 'Possible titles' (0), 'Working reviews' (0), and 'Maximum ribbons' (0). The next section is 'Official SDDA history snapshot' with a note 'Retrieving the latest Trial Workbook from the SDDA Forms page...' and a 'Refresh history' button. A warning icon and text state: 'Component Q counts come from the current official SDDA Trial Workbook and support title proximity and level-specific Working review. The workbook does not contain the detailed component scores needed to prove Gold or Championship combinations.' Below this are three buttons: 'Title achieved - Working required', 'Component title opportunity', and 'Special Excellent opportunity'. The next section is 'Amateur entries requiring Working review' with a note 'No Amateur entries conflict with completed-level history.' and an 'Open Entry Roster' button. A search bar is present with the text 'Search handler, dog, SDDA number, or title note'. A message states: 'No immediate title opportunities, Working reviews, title notes, or approved move-ups match this trial.' The bottom section is partially visible and titled 'Possible titles and ribbon progression'.

Figure 13. Close to Titles and Ribbon Planning. The top summary gives the maximum possible ribbon count, with Working reviews and title details below.

Title Watch combines current accepted/scored entries with the latest public SDDA dog-history workbook snapshot. It highlights historical component Qs, possible same-trial Special titles, processed titles requiring Working at that level, and component-specific opportunities.

- A standard Started/Advanced/Excellent title requires a qualifying score in Container, Interior, and Exterior at that level.
- An untitled dog passing all three components of a level at the same trial may earn the Special designation.
- Elite requires all three components passed at the same trial.
- A Games title requires three passes in that Game; Games Championship requires titles in at least three Games.
- Gold/championship progress is not accepted from competitor self-reporting. Confirm it against detailed official SDDA records.

AUTHORITY: Title Watch is planning support, not SDDA title issuance. If a dog is unmatched, history is incomplete, or a title affects stream eligibility, verify with SDDA before representing the status as official.

11. Finances, workbook, backup, and closeout

11.1 Financial Summary: start here

Open the trial, then Financial Summary in the left menu. Amounts are Canadian dollars. Accepted entries generate charges automatically from Scent and Games pricing; do not enter the same fees again as a manual charge.

Figure 14. Live Example Trial financial summary, September 2, 2026. Figures demonstrate the screen layout, not recommended entry prices. Judge and SDDA estimates are separate from actual expenses.

Gross charges include adjustments. Fees waived are not money collected. Collected is payments minus refunds; Outstanding and Credits show handler balances. Cash net subtracts actual expenses from net collections, without deducting the displayed estimates again.

11.1a Record a handler payment

- 1. Find the handler.** Scroll to Handler accounts - payments and waivers. Search by handler or dog; use Owing, Credit, Settled, or All balances as needed.
- 2. Review the dogs.** Matching handler name and email group dogs together. Entries without email remain separate. Check the dogs' charges and balances before recording money.
- 3. Select Record payment.** For multiple dogs, keep All dogs - allocate payment, or choose one dog. The amount starts with the current balance; replace it with the amount actually received.

Payment received

Dog entry
All dogs — allocate payment ▼

Amount (\$)
200.00

Date
09/02/2026 📅

Payment method
E-transfer, cash, cheque...

Reference

Notes

Save **Cancel**

Figure 15. Payment received dialog. This unsaved example starts at \$200.00 for two dogs. No money is processed by this form; it records money already received.

- 4. Enter payment details and Save.** Confirm date, payment method, reference, and notes. Save once, wait for the dialog to close, and check the updated net paid and balance.
- 5. Check partial or excess payments.** A partial payment leaves an outstanding balance. An all-dogs payment fills positive dog balances in order; excess remains as credit on the last dog. Inspect each dog when another dog already has credit.

11.1b Waivers, restoration, refunds, and corrections

1. Waive an unpaid fee. On the specific dog's row, choose Waive fees. Enter all or part of the current outstanding balance and explain why in Notes. Save and check Fees waived and the balance; collected money does not increase.

Fees waived

Dog entry

Adrienne Gould · Peaches · \$100.00

Waive all or part of this dog's current outstanding balance. Existing payments remain collected. This is a fixed amount, not free future entries; review the balance after adding runs or changing prices.

Amount (\$) 100.00 **Date** 09/02/2026

Payment method E-transfer, cash, cheque... **Reference**

Notes

Save **Cancel**

Figure 16. Fees waived dialog. The reason is required; a waiver cannot exceed this dog's outstanding balance. The example was opened and cancelled without saving.

2. Restore a waiver. Locate the waiver in Ledger - transaction history and choose Restore fees. Add a reason and save. It restores the original amount once and retains both records; waivers cannot be edited or deleted.

3. Record money returned. Choose Refund for that dog, enter the amount, date, method, reference and reason, then Save. Refund is unavailable when no net payment exists, and cannot exceed that dog's net payments.

A refund returns recorded money but does not cancel the entry charge. If the fee should no longer be owed, separately correct the entry or use an appropriate waiver/credit adjustment. A waiver is a fixed amount, not free future entries: recheck balances after adding runs or changing prices.

Use Adjust for an explained additional charge (positive) or credit (negative). In the ledger, use Edit to correct an existing transaction; it cannot switch dogs or transaction type. Use Delete only for a genuinely mistaken ordinary record. Corrections remain audited; do not clear the activity journal to fix money records.

11.1c Expenses and financial statements

1. Select Add expense. Choose Trial expense, Judge expense, Volunteer expense, or SDDA remittance paid. Enter the actual amount, date, method, reference, payee, and a useful description; then Save.

Figure 17. Add expense dialog, opened without saving. Record an actual cost once; an estimate is not a payment.

2. Reconcile the ledger. Compare receipts, cash and transfers with recorded payments, refunds and expenses. Review each handler's Payment and waiver history. Judge estimates do not include all travel, meals or accommodation costs.

3. Export Excel. The sticky header exports Entry balances, Ledger, Summary, and Judge estimates worksheets. Entry balances contains numeric amounts and a balance formula; retain the file with the trial records.

4. Print statement. Use Print statement in a browser that supports printing and inspect print preview before printing or saving as PDF. Clear account search/filter controls first for a complete on-screen account list.

PRESERVE THE RECORD: Back up the trial before major corrections. Use Activity Journal to review who recorded or changed information. Completed trials must be reopened before financial changes; repeat statements and backups after corrections.

11.2 Official SDDA workbook

Figure 18. Official Workbook. Export is enabled only when required trial identity and score checks pass; open the result in Excel to recalculate the official formulas.

- 1. Finish accepted-entry scoring.** Resolve registration numbers, trial numbers, judges, results, scores, and times.
- 2. Open Official workbook.** Read blockers and warnings. Correct source data rather than editing around a blocker.
- 3. Export each day group.** The official workbook has two day sections. TrialDesk groups a 3-4 day event into separate one/two-day workbook exports.
- 4. Open in Excel.** Allow original formulas to recalculate. Review Trial Info, level sheets, Games, Summary, High-in-Trial, fees, labels, formatted results, and the embedded SDDA Dogs registry.
- 5. Submit outside TrialDesk.** TrialDesk downloads a completed copy; it does not upload directly to SDDA. Follow SDDA's current submission/email instructions.

11.3 Backup and closeout

Figure 19. Trial Closeout. Resolve required items, review final exports, download the JSON backup, and only then complete and lock the trial.

- 1. Open Trial closeout.** Resolve red blockers and review amber warnings.
- 2. Download complete trial backup.** Store the JSON backup with the final workbook, results, running order, financial statement, and retained score-sheet records.
- 3. Complete and lock.** Completion prevents operational edits. Use Reopen only for an authorized correction and repeat exports afterward.

ARCHIVE: Keep a durable copy outside the browser. A downloaded backup is only useful if it is stored in a known, backed-up location and can be associated with the correct trial number/date.

11.4 Activity Journal

Figure 20. Activity Journal. Search or filter the permanent secretary-facing history and print it for the closeout package.

The journal groups trial setup, pricing, offering changes, CSV import batches, entry changes, payments, waivers, score corrections, and completion. It identifies who performed the action and shows the meaningful change without unnecessary database fields.

- 1. Search or filter.** Use the search box for an action, person, dog, or record and the record-type list to narrow the journal.
- 2. Review material changes.** Confirm imports are grouped as batches and corrections name the affected entry, score, payment, or trial setting.
- 3. Print journal.** Save a PDF or printed copy with the final trial records before locking the trial.

12. Troubleshooting and control checklists

12.1 Common problems

Symptom	Secretary action
First login fails; Retry works	Synchronize Windows date/time and time zone; close tabs and sign in again. The production login should use a full authenticated navigation.
Trial or Finances unavailable	Confirm the signed-in profile has access to the trial and that the required migrations were applied.
Entry absent from order/sheets	Confirm the entry is Accepted, not merely Received; verify at least one valid run and offering.
CSV row rejected	Read the row-specific error; correct header mapping, identity, day, level, component, stream, or duplicate data.
FEO option missing	Enable Allow FEO entries for that exact offering and save setup. Regular remains the default.
Move-up unavailable	Confirm lower-level component qualification, destination offering, and permitted next level. Elite requires the Excellent title.
Wrong sheet count	Compare accepted operational runs; exclude waitlisted/withdrawn/cancelled entries and check every imported selection.
PDF fields misaligned	Stop printing and report the exact level/component/Game. Each official template has its own mapping.
Workbook blocker	Correct the underlying trial/entry/score data, then export a fresh untouched official workbook copy.

12.2 Final pre-trial checklist

- ☐ All intended entries accepted and balances reviewed
- ☐ Registration-pending list resolved or actively controlled
- ☐ Every run assigned to the correct day/level/component/stream/group
- ☐ Officials, second dogs, FEO, and BIS sequenced correctly
- ☐ Conflict checks reviewed after every move-up and manual reorder
- ☐ One page from every score-sheet template visually checked
- ☐ Running order exported, printed, and posted
- ☐ Desk supplies, spare sheets, timers, ribbons, and backup equipment ready

12.3 Final closeout checklist

- ☐ All signed sheets returned and results entered
- ☐ Placements reviewed; FEO excluded
- ☐ Title opportunities reviewed against official history
- ☐ Payments and expenses reconciled
- ☐ Official workbook exported, recalculated in Excel, and reviewed
- ☐ Results, workbook, finances, activity, and running order archived
- ☐ Complete JSON backup downloaded
- ☐ Trial completed and locked after all required submissions are ready

13. Page and button glossary

Use this section as a quick lookup when you know the control name but not where it is located. Controls that change data are disabled when prerequisites are incomplete or the trial is completed and locked.

13.1 Dashboard and trial setup

Button or control	Location	Function
Create trial / Create New Trial	Dashboard or sidebar	Opens the new-trial form.
Create SDDA Trial	All Trials	Opens the new-trial form.
Open trial	All Trials card	Opens the selected trial workspace.
Edit trial	All Trials card	Opens identity, format, and guarded trial-day editing for the selected trial.
Copy trial	All Trials card or Edit trial	Starts a clean draft using reusable setup from the selected trial.
Delete draft	Draft trial card	Permanently removes an unused draft after confirmation; unavailable after operational use.
Open setup	Dashboard	Opens Trial Details for the selected trial.
All trials / View all	Dashboard or sidebar	Opens the complete trial list.
Built-in entry form	Dashboard	Opens the selected trial's competitor form.
Google Form CSV / Entry roster	Dashboard	Opens Entries for import or review.
Add trial day	Create trial	Adds another date, up to the application limit of four.
Remove day	Create trial	Removes that date before the draft is created.
Cancel	Create trial	Returns to Trials without creating a draft.
Create Draft Trial	Create trial	Creates the editable trial workspace; it does not open entries.
Save trial changes	Edit trial	Saves the trial name, host club, venue/address, and format without changing entries or runs.
Add trial day	Edit trial	Adds another empty trial day, up to four.
Remove Day	Edit trial	Removes only the final day and is blocked while that day has offerings or runs.
Save trial days	Edit trial	Atomically saves chronological date changes while preserving existing day assignments.
Create draft copy	Copy trial	Creates a new draft with reusable setup but no operational or financial records.
Save setup	Trial Details sticky header	Saves offering, Games, and setup changes currently pending.
Save public details and entry schedule	Trial Details	Saves secretary contact, payment and cancellation text plus the general opening and public closing times. Registered participants open three days early.
Select all / Clear Scent	Trial offering setup	Selects or clears all Scent level/component offerings.
Select all / Clear Games	Trial offering setup	Selects or clears all Games offerings.
Save Scent pricing	Scent entry pricing	Saves component, package, and Elite fees.

Button or control	Location	Function
Open entries and enable form	Trial operations	Re-enables the public form after a manual closure; scheduled opening and closing times still control availability.
Close entries	Trial operations	Emergency manual closure that immediately stops new public submissions for the whole trial without restricting secretary entry or editing.
Open or Close this day	Trial day header	Allows or stops entries for only that day.
Save day details	Trial day	Saves the date, SDDA trial number, and day judge.
Offering tile	Trial day offerings	Turns that Scent component or Game on or off.
Allow FEO entries	Selected offering	Shows or removes FEO for that exact public offering.
Refresh from SDDA	SDDA Dog Registry	Stages and activates the newest official SDDA Dogs list; administrator only.
Search registry	SDDA Dog Registry	Looks up an SDDA dog number or call name in the active registry.

13.2 Navigation sharing and team access

Button or control	Location	Function
Trial workflow stage	Top of Trial Details	Opens the named stage and shows whether its prerequisite is ready.
Competitor Entry Form	Sidebar or Trial operations	Opens the public form in a separate page.
Copy Entry Link	Sidebar or Trial operations	Copies the public form address to the clipboard.
Trial Team	Sidebar or Trial operations	Opens access management for the trial.
Add to trial	Trial Team	Adds a registered user or updates an existing member's role.
Trash icon	Trial Team member	Removes a non-owner member after confirmation.
Close to Titles and Ribbons	Dashboard, Trial Details, or sidebar	Opens title opportunities, Working review, and maximum ribbon planning.
Sign In	Login	Authenticates the secretary and opens the dashboard.
Forgot your password	Login	Requests a Supabase password-reset email.
Register here	Login	Opens account registration and email confirmation.

13.3 Competitor entry form

Button or control	Location	Function
Load my entry	Top of public form	Loads an editable entry when registration/confirmation number and email both match.
Check SDDA registry	Competitor and dog step	Checks the entered dog number and call name against the active registry.
Back / Continue	Entry form steps	Moves between Competitor and dog, Runs, Policies, and Review without submitting.
Submit entry	Review step	Creates the entry after required data, selections, declaration, and policies pass validation.
Save entry changes	Review step while editing	Saves permitted competitor or secretary corrections.
Print receipt	Entry received page	Prints the received selections, estimated amount, and return instructions.
Download receipt PDF	Entry received page	Downloads a formatted receipt containing the active private edit link.
Edit entry	Entry received page	Returns to step one with the submitted information populated.
Copy private entry link	Entry received page	Copies the confidential edit link; share only with that competitor.

13.4 Entries and import

Button or control	Location	Function
Search	Entries	Finds a handler, dog, or SDDA number.
Status filter	Entries	Shows All, Received, Accepted, Waitlisted, Rejected, or other statuses.
Export mailing list XLSX	Entries	Exports email, handler, received selections, and amount owing.
Add secretary entry	Entries	Opens the full entry form for a signed-in secretary to transcribe a paper or day-of entry.
Import Google Form CSV	Entries	Selects and previews a familiar Google response CSV.
Import entries	CSV import review	Creates valid entries and reports rejected rows as one audited batch.
Edit entry	Entry card	Opens the secretary edit form with the current entry repopulated.
Secretary decision	Entry card	Changes Received to Accepted, Waitlisted, Rejected, Withdrawn, or another permitted status.
Print or Save PDF	Entry receipt/review	Prints the entry receipt with selections, amount, and edit link.

13.5 Running order score sheets and scoring

Button or control	Location	Function
Day Level Component filters	Running Orders	Select the exact order being reviewed.
Apply SDDA order	Running Orders	Applies Officials, Regular, Second dog, FEO, and BIS grouping rules.
Run group list	Running Orders row	Marks the run's operational group when the secretary must change it.
Move up	Running Orders row	Applies a component-specific approved move-up to an offered next level.
Drag handle / arrows	Running Orders row	Moves a run manually; re-check conflicts afterward.
Save	Running Orders	Persists the displayed order and group changes.
Export running order XLSX	Running Orders	Downloads the formatted multi-day running-order workbook.
Export complete packet	Score Sheets	Downloads all eligible Scent sheets as one PDF.
Export day packet	Score Sheets	Downloads one day's eligible Scent sheets.
Export Games packet	Score Sheets	Downloads all or one day's Games sheets.
Scent or Games filter	Score Entry	Switches scoring discipline and shows its recorded count.
Trial day filter / Search	Score Entry	Narrows cards without changing scores.
Save and next	Score card	Saves that run and advances to the next displayed card.
Save all changes	Score Entry sticky header	Saves every changed score card before a break.

13.6 Results titles finances and closeout

Button or control	Location	Function
Print or Save PDF	Results	Prints provisional placements after score review.
Export Excel	Close to Titles	Exports title opportunities, ribbon totals, and Working reviews.
Print or Save PDF	Close to Titles	Prints the title and ribbon-planning report.
Refresh history	Close to Titles	Refreshes official SDDA workbook history used for title proximity.
Open Entry Roster	Close to Titles	Opens entries requiring Working review.
Print statement / Export Excel	Finances	Produces the current financial statement or workbook.
Add expense	Finances	Records an operating, judge, volunteer, or SDDA remittance expense.
Record payment	Handler account	Allocates money already received across selected dogs.
Waive fees	Dog balance	Waives an amount with a required reason; does not remove runs.
Refund	Dog balance	Records money returned against collected funds.
Adjust	Dog balance	Records a documented financial correction.
Restore waiver	Payment and waiver history	Reverses a prior waiver when permitted.
Pencil / Trash	Financial ledger	Edits or deletes a ledger item with confirmation and audit history.
Export official workbook	Official Workbook	Fills a fresh official workbook after blockers pass.
Print journal	Activity Journal	Prints or saves the filtered secretary-facing audit record.
Results Workbook Finances Activity links	Trial Closeout	Opens each final export for review.
Download complete trial backup	Trial Closeout	Downloads the complete JSON recovery record.
Complete and lock trial	Trial Closeout	Locks operational editing after required checks pass.
Reopen for corrections	Completed trial closeout	Reopens a completed trial and records the action.

Sources and scope notes

SDDA Master Rule Book v5.1 (effective July 1, 2026)

SDDA Rules and Rulebook page

SDDA website

The operating sequence, primary pages, and visible controls were reviewed against K:\TrialManager through September 14, 2026. Screenshots show read-only inspection and previously prepared unsaved finance dialogs; no live transactions or operational changes were submitted for this manual. The current SDDA rulebook and official forms remain controlling.

MAINTENANCE: Revise this manual whenever SDDA publishes a new rulebook, official score sheet, Games form, results workbook, fee schedule, or submission instruction-or whenever TrialDesk changes a workflow shown here.
